

## **Auditor says Christina overcharged state**

The state auditor says the Christina School District should repay the state more than a million dollars. An audit of salary and personnel performance showed the district overcharged the state for salaries amounting to more than 2-point-3 million dollars. The auditor says the district's actual number of positions for supervisors, psychologists and nurses exceeded the number of authorized positions. The audit also showed funding errors and salaries calculated incorrectly. The district did make corrections in overcharges of more than 686-thousand dollars. The auditor is recommending the repayment of 1-point-6 million dollars, and monitoring and tracking salaries charged to the state.
